## SECTION 2 – HAZARDS IDENTIFICATION

### Classification of the substance or mixture

**SUSMP Poisons Schedule**

This product is **classified as a Scheduled Poison** according to the SUSMP.

**Dangerous Goods**

This product is **NOT classified as Dangerous Goods** according to the Australian Dangerous Goods (ADG) Code.

**GHS Classification**

Aspiration Hazard – Category 1

### Label elements

**GHS label pictograms**

- Health Hazard

**Signal word**

- DANGER

### Hazard statement(s)

May be fatal if swallowed and enters airways

### Precautionary statement(s): General

Keep out of reach of children. In emergencies call 000.

### Precautionary statement(s): Prevention

Keep away from heat/sparks/open flames/hot surfaces – No smoking. Wear protective clothing, eye and face protection.

### Precautionary statement(s): Response

IF SWALLOWED: Immediately call a Poison Center or doctor. Rinse mouth

### Precautionary statement(s): Storage

Store locked up and in accordance with local regulatory requirements.

### Precautionary statement(s): Disposal

Dispose of contents/container in accordance with local regulations.

**Note**

**IMPORTANT** The Hazard Classifications contained in this SDS, only apply to the product in its liquid concentrated form. Good hygiene and housekeeping practices should be adhered to.

## SECTION 3 – INGREDIENTS

<table>
<thead>
<tr>
<th>Ingredients:</th>
<th>CAS Number:</th>
<th>Proportion:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mineral oil</td>
<td>8042-47-5</td>
<td>30-60% w/w</td>
</tr>
<tr>
<td>Distillates (petroleum) hydrotreated light</td>
<td>64742-47-8</td>
<td>10-30% w/w</td>
</tr>
</tbody>
</table>

**Ingredients determined to be non-hazardous at the concentrations used.**

**Various** <10% w/w

**NOTE:** Ingredients determined not to be hazardous are present in concentrations that do not exceed the relevant cut-off concentrations as found from NOHSC publication “List of Designated Hazardous Substances” or have been found NOT to meet the criteria of a hazardous substance as defined in the NOHSC publication “Approved Criteria for Classifying Hazardous Substances”, or have been found NOT to meet the criteria of a dangerous substance as defined in the GLOBALLY HARMONIZED SYSTEM OF CLASSIFICATION AND LABELLING OF CHEMICALS (GHS), 4th edition United Nations 2011. Listed ingredients may be below the cut-off concentrations for classification as hazardous, but are listed for information purposes and for additive effects.
SECTION 4 - EMERGENCY AND FIRST AID PROCEDURES

**Scheduled Poisons**
Poisons Information Centre in each Australian State capital city or in Christchurch, New Zealand can provide additional assistance for scheduled poisons. (Phone Australia 131126 or New Zealand 0800 764 766).

**First Aid Facilities**
Normal washroom facilities.

**Skin contact**
Wash skin with plenty of water. Remove contaminated clothing and wash before re-use. Seek medical advice (e.g. doctor) if irritation, burning or redness develops.

**Eye contact**
Immediately irrigate with water for at least 20 minutes. Eyelids to be held open. Seek medical advice (e.g. ophthalmologist) if any irritation persists.

**Ingestion**
Do NOT induce vomiting. Rinse mouth thoroughly with water immediately. Give water to drink. If vomiting occurs, give further water to achieve effective dilution. Seek medical advice (e.g. doctor).

**Inhalation**
Remove victim to fresh air away from exposure - avoid becoming a casualty. Seek medical advice (e.g. doctor) if symptoms persist.

**Advice to Doctor**
Treat symptomatically. All treatments should be based on observed signs and symptoms of distress of the patient.

**Aggravated Medical Conditions**
None known.

SECTION 5 – FIRE FIGHTING MEASURES

**Fire and Explosion Hazards**
If involved in a fire will emit toxic fumes.

**Extinguishing Media**
Foam, dry agent (carbon dioxide, dry chemical powder).

**Fire Fighting**
Keep containers exposed to extreme heat cool with water spray. Fire fighters to wear self-contained breathing apparatus if risk of exposure to products of combustion or decomposition. Evacuate area - move upwind of fire.

**Flash Point**
> 80 °C

SECTION 6 – ACCIDENTAL RELEASE MEASURES

**Emergency Procedures**
No HAZCHEM code.

**Occupational Release**
Minor spills do not normally need any special clean-up measures.
In the event of a major spill, prevent spillage from entering drains or water courses. For large spills, or tank rupture, consider initial evacuation distance of 200 metres in all directions. Stop leak if safe to do so. If available, use water spray to disperse vapour. Wear appropriate protective equipment as in section 8 below to prevent skin and eye contamination. Spilt material may result in a slip hazard and should be absorbed into dry, inert material (e.g. sand, earth or vermiculite), which then can be put into appropriately labelled drums for disposal by an approved agent according to local conditions. Residual deposits will remain slippery. Wash area down with excess water. If contamination of sewers or waterways has occurred advise the local emergency services. In the event of a large spillage notify the local environment protection authority or emergency services.

SECTION 7 – HANDLING AND STORAGE

**Handling**
Avoid contact with incompatible materials. When handling, DO NOT eat, drink or smoke. Keep containers closed at all times. Avoid physical damage to containers. Always wash hands with water after handling.

**Storage**
Store in a cool, dry, place with good ventilation.
SAFETY DATA SHEET
“STAINLESS STEEL MAGIC WIPES”

SECTION 8 – EXPOSURE CONTROLS AND PERSONAL PROTECTION

Exposure Limits
National Occupational Exposure Limits, as published by Safe Work Australia:
Time-weighted Average (TWA): None established for specific product.
Short Term Exposure Limit (STEL): None established for specific product.
Exposure Limits of individual ingredients: Mineral oil TWA 5mg/m^3 (oil mist)

Engineering Controls
No special requirements.

Personal Protective Equipment
Use good occupational work practice. The use of protective clothing and equipment depends upon the degree and nature of exposure. Final choice of appropriate protection will vary according to individual circumstances i.e. methods of handling or engineering controls and according to risk assessments undertaken. The following protective equipment should be available;

Eye Protection
Generally, not required to handle as per label directions.
The use of safety glasses with side shield protection, goggles or face shield is recommended to handle in quantity, cleaning up spills, decanting, etc. Contact lenses pose a special hazard; soft lenses may absorb irritants and all lenses concentrate them.

Skin Protection
Generally, not required to handle as per label directions.
Overalls, work boots and elbow length gloves are recommended for handling the concentrated product (as per AS/NZS 2161, or as recommended by supplier) to handle in quantity, cleaning up spills, decanting, etc.

Protective Material Types
Material suitable for detergent contact – Butyl rubber, Natural Latex, Neoprene, PVC, and Nitrile.

Respirator
Generally not required to handle as per label directions.

SECTION 9 – PHYSICAL AND CHEMICAL PROPERTIES

Physical State
Moistened wipes

Odour
Lemon

Boiling Point
Not available

Vapour Pressure
Not available

Flash Point
>80°C

Water Solubility
Miscible in all proportions

Volatile Organic Compounds (VOC)
Not available

Viscosity
Not available

Evaporation Rate
Not available

SECTION 10 – STABILITY AND REACTIVITY

Chemical Stability
Stable at normal temperatures and pressure.

Conditions to Avoid
Oxidising agents, extremes in temperature.

Incompatible Materials
Oxidising agents.

Hazardous Decomposition
Product can decompose on combustion to form Carbon Monoxide, Carbon Dioxide, and other possibly toxic gases and vapours.

Hazardous Reactions
None known.

SECTION 11 – TOXICOLOGICAL INFORMATION

POTENTIAL HEALTH EFFECTS
No adverse health effects expected if the product is handled in accordance with this Safety Data Sheet and the product label. Symptoms or effects that may arise if the product is mishandled and overexposure occurs are:

Ingestion
short term exposure
Expected to be of low toxicity: Aspiration into lungs when swallowed or vomited may cause chemical pneumonitis. Can result in nausea, vomiting and central nervous system depression.
long term exposure | No information available.
---|---
Skin contact
short term exposure | May have a degreasing action on the skin. Prolonged or repeated exposure can lead to dermatitis in sensitive individuals.
long term exposure | Prolonged and repeated skin contact with undiluted solutions may induce eczematoid dermatitis.

Eye contact
short term exposure | Mild eye irritant.
long term exposure | No information available.

Inhalation
short term exposure | Not expected to be a respiratory irritant. Breathing in high concentrations can produce central nervous system depression.
long term exposure | No information available.

Carcinogen Status
SWA | No significant ingredient is classified as carcinogenic by SWA.
NTP | No significant ingredient is classified as carcinogenic by NTP.
IARC | No significant ingredient is classified as carcinogenic by IARC.

Respiratory Sensitisation | Not expected to be a respiratory sensitizer.
Skin Sensitisation | Not expected to be a skin sensitizer.
Germ cell mutagenicity | Not considered to be a mutagenic hazard.
Reproductive Toxicity | Not considered to be toxic to reproduction.
STOT-single exposure | Not expected to cause toxicity to a specific target organ.
STOT-repeated exposure | Not expected to cause toxicity to a specific target organ.

Aspiration Hazard | Aspiration into lungs when swallowed or vomited may cause chemical pneumonitis. Can result in nausea, vomiting and central nervous system depression.

### SECTION 12 – ECOLOGICAL INFORMATION

| Eco-toxicity | Aquatic organisms: No acute toxicity to aquatic organisms is expected at the maximum water solubility of this material. Avoid contaminating waterways. Primary component “petroleum distillate” is classified as: Fish: Low toxicity: LC/EC/IC50> 1000mg/l Aquatic invertebrates: Low toxicity: LC/EC/IC50> 1000mg/l Algae: Low toxicity: LC/EC/IC50> 1000mg/l |
| Product (as sold) | Persistence and degradability | Expected to be biodegradable. Degrades rapidly in air by photo-chemical means. |
| | Bio accumulative potential | No data. |
| | Mobility in soil | Floats on water. Adsorbs to soil and has low mobility |
| | Other adverse effects | None available for specific product. |
| Environmental Protection | Expected to be harmful to aquatic species. Product miscible in all proportions with water. As with any chemical product, do not discharge BULK quantities into drains, waterways, sewer or environment. Inform local authorities if this occurs. |

### SECTION 13 – DISPOSAL CONSIDERATIONS

| Disposal | Dispose of material according to Local Authority Regulations or through a licensed waste contractor. |

### SECTION 14 – TRANSPORT INFORMATION

| Labels Required | ADG | Not currently classified as Dangerous Goods by the criteria of the Australian Dangerous Goods Code (ADG Code) for transport by Road and Rail. |
SAFETY DATA SHEET
“STAINLESS STEEL MAGIC WIPES”

IMDG Marine Pollutant | Not currently classified as Dangerous Goods by the criteria of the International Maritime Dangerous Goods Code (IMDG Code) for transport by sea.
HAZCHEM | None allocated

Land Transport (ADG)

| UN Number | none allocated | ADG Classification | none allocated
| Shipping Name | none allocated | ADG Subsidiary Risk | none allocated
| Hazchem Code | none allocated | Packing Group | none allocated
| Packaging Method | none allocated | Special Provisions | none allocated
| Segregation | none allocated |

SECTION 15 – REGULATORY INFORMATION

GHS Classification | This product is classified as Hazardous according to the Globally Harmonised System of Classification and labelling of Chemicals (GHS) including Work, Health and Safety regulations, Australia.
SUSMP | This product is classified as a Schedule 5 Poison according to the SUSMP.
ADG Code | This product is NOT classified as Dangerous Goods according to the Australian Dangerous Goods Code.
AICS | All ingredients present on AICS.

SECTION 16 – OTHER INFORMATION

Issue Date | 30th November 2016
Version Number | V 2.0

Abbreviations and acronyms

| AICS: Australian Inventory of Chemical Substances.
| CAS Number: Chemical Abstracts Service Registry Number.
| GHS: Globally Harmonized System of Classification and Labelling of Chemicals
| HAZCHEM: An emergency action code of numbers and letters which gives information to emergency services.
| HSIS: Hazardous Substances Information System
| IARC: International Agency for Research on Cancer.
| NTP: National Toxicology Program (USA).
| SDS: Safety Data Sheet
| STEL: Short Term Exposure Limit.
| SUSMP: Standard for the Uniform Scheduling of Medicines and Poisons.
| TWA: Time Weighted Average.
| UN Number: United Nations Number.

Material Safety Data Sheets – individual raw materials – Suppliers
This SDS summarizes at the date of issue our best knowledge of the health and safety hazard information of this product, and in particular how to safely handle and use this product in the workplace. Since the supplier cannot anticipate or control the conditions under which the product may be used, each user must, prior to usage, review this SDS in the context of how the user intends to handle and use the product in the workplace. If clarification or further information is needed to ensure that an appropriate assessment can be made, the user should contact this supplier.

The SDS is valid for five years from date of issue but may be withdrawn and revised at any time prior to that date. All information contained in the Data Sheet is as accurate as possible at the time of issue. It is meant to describe the safety requirements of our products and should not be construed as guaranteeing specific properties. No expressed or implied warranties nor any responsibility for damages resulting from use of the information are given other than those implied mandatory by Commonwealth, State or Territory Legislation. If this product is to be re-packaged by others, it will be necessary for a new SDS to be generated by the re-packer.
